Hi All,

Attached are the updated screen shots for International Stock. They include:

- 1) the Preference screen (filename: pref1)
- 2) the Add a Stock screen (filename: addtable1)
- 3) the Add Indices screen (filename: addindices -- as listbox with checkboxes for adding indices)
- 4) the Stock Table screen (filename: editstock -- with the edit button on the toolbar removed to reflect the double click functionality -> Edit a Stock screen or Edit Index screen)
- 5) the Edit a Stock screen (filename: edittable -- the stock name and exchange would be prefilled)
- 6) the Edit Index screen (filename: editindices -- as listbox with radio button that is prefilled with index to be edited)

Additionally, Alex and I discussed how to handle the editing from the Stock Table screen -- if the member double-clicks on a stock it will bring up the Edit a Stock (edittable file) screen, and if the member double-clicks on an index it will bring up the Edit Index (editindices file) screen.

Alex, if anything is different from what we discussed please let me know and I will fix it immediately.

Thanks,
Alexis
